Brian then introduced Frank Robertson, who proceeded to provide a comprehensive update on the reclaimed water program. This included a description of the digital monitoring equipment that will be installed in each house on the system. He also indicated that equipment will be installed that will assist the homeowner in monitoring their water systems with features that would actually provide savings. He touched on the rain barrel program, which apparently is very successful. Frank was assisted by other county staff who had expertise in the system. He reviewed the fact that the system is being put in place slowly to allow for maximum understanding by the homeowners as the system is installed. Frank concluded by indicating that this presentation will be made to other community groups within the Palm Harbor area. Following questions and comments, the presentation was concluded.

The meeting was adjourned at 7:40 PM.
